OBJECTIVE

Front-End Web Developer with 5+ years building and maintaining internal business systems and public-facing websites with React, Angular, and JavaScript. Experienced in taking projects from UI design through back-end integration, with a focus on clean, maintainable code and interfaces people rely on daily.

EDUCATION

Imam Abdulrahman Bin Faisal University - College of Science & Humanities

Bachelor of Computer Science, May 2020

PROFESSIONAL EXPERIENCE

Arabian Pipeline & Services Co. Ltd. (Anabeeb) — Sep 2022 - Present

Media Developer

- Built and maintained 10+ internal portals and tools (employee self-service, project planning, appraisals, safety reporting) using React, Angular, Bootstrap, and jQuery, from UI design through back-end integration.
- Partnered with the back-end team to integrate new interfaces with existing systems, ensuring smooth, reliable data flow across the platform.
- Tested and debugged features across releases to maintain reliability and performance for all users.
- Documented technical processes and user guides to support end-users and reduce repeat support requests.
- Reviewed teammates' code and gave feedback to help maintain consistent standards across the team.
- Proposed and implemented improvements to navigation and workflow based on user feedback.

Arabian Pipeline & Services Co. Ltd. (Anabeeb) — Feb 2021 - Sep 2022

IT Support Technician

- Provided first-line technical support, troubleshooting hardware and software issues for end-users.
- Tested and validated software updates before deployment to the network.
- Managed and resolved support tickets through a ticketing system, keeping users updated accurately and on time.
- Assisted in developing and delivering IT training programs for end-users.
